Campaign Spending: [List of Filers](#)

I came from China 23 years ago to find freedom. America is free compared to most of the world, but now I'm frightened to see our government leading us in the wrong direction.

The communist ideas that Americans fought against for so long are now at our doorstep and are welcomed by many politicians. That scares me. That is one of the reasons that I want to run for public office. I cannot sit and do nothing while I see this country slide away from its principle foundations.

God created the perfect world and He created us in his own image and gave us freedom and rights. He even allows us to choose not to believe in Him. But the government is acting as a replacement for God and taking our natural rights away.

We shouldn't ask government to give us freedom, because it isn't the government's to give. We must stop government from taking away our freedoms. It is always better for us as individuals to make decisions for ourselves than to let others dictate our lives. I believe that the only function of government is to protect our God given rights. And no more.

When a family decides where to send their children to go to school, they get better education than when the politicians decide. When a person decides what doctor to go to, they get better care. When a person decides how to use his hard earned money, the money will be better used.
